

Virtual Private Servers

Xecunet VPS Hosting allows you to have all the features of a dedicated server without the upfront costs of hardware and software licensing. Virtual Private Servers allow you to have complete control of your hosting environment while adding the redundancy of Xecunet's high-performance, fault-tolerant cloud solution.

In addition, Xecunet offers multiple operating systems as well as monthly SaaS offerings from Microsoft and others.

Your VPS is able to scale with your needs. Need extra RAM or more CPU power? Not a problem. One call is all it takes to upgrade your environment without the need to reinstall your OS and applications. Multiple VPS can be linked allowing you to create a virtual rack environment.

Hosted VPS Service Levels

| | Tier 1 | Tier 2 | Tier 3 | Tier 4 | Tier 5 | Tier 6 |
|-----------------|--------|--------|--------|--------|--------|--------|
| Cores | 1 | 2 | 4 | 8 | 12 | 24 |
| Ram | 1GB | 2GB | 4GB | 8GB | 16GB | 32GB |
| Storage | 40GB | 60GB | 100GB | 200GB* | 350GB* | 600GB* |
| Transfer | 1TB | 1.5TB | 2TB | 3TB | 3TB | 3TB |

* SSD Drives for ultra-fast, low-latency I/O
